2nd European

Echocardiography Course on Congenital Heart Disease

Prague, October 10-13, 2007

("From Art Deco to Art d'Echo")

Postgraduate Course on Basic & Advanced
Echocardiography in Congenital Heart Disease in
children, adolescents and adults

Under auspices of European Society of Cardiology, European
Association of Echocardiography,
Association of European Paediatric Cardiology,
and Czech Society of Cardiology

Dear Colleagues

The Imaging Working Group of the Association of European Paediatric Cardiology in collaboration with the Working Group of Grown-up Congenital Heart Disease of the ESC and the European Association of Echocardiography will organise the 2nd European Course in Congenital Heart Disease in Prague, on 10-13 October 2007.

This four-day course is intended for cardiologists, paediatric cardiologists, anaesthesiologists, cardiac surgeons and sonographers. The course will focus on patho-morphological correlations in a large variety of congenital heart disease from young children through to adults. The role of echocardiography in the functional assessment of patients with varying age under different conditions (heart failure, pulmonary hypertension, Fontan circulation etc.) will also be discussed.

The course will provide both theoretical and practical review of echocardiographic techniques used in the current era, including Tissue Doppler Imaging, cardiac resynchronisation therapy, and real time 3D Echocardiography. A forum of distinguished speakers and appreciated teachers from all over Europe and overseas will share their experience with the audience.

On behalf of the course organisers I am inviting you to participate in this course hoping to offer a comprehensive echocardiographic overview of congenital heart disease, which can act as a substantial help in the preparation of the accreditation examination

We hope to achieve the success of our 1st Echocardiography Course, which took place in Leuven on September 20-23, 2006.

On behalf of course organisers,
Jan Marek

**Due to the interactive nature of the course,
we advise applicants to book early to guarantee a place on the course.**

Topics:

Echo-morphological correlates

Functional echocardiographic assessment

Standardisation of European echocardiographic practice

Pitfalls in clinical paediatric echocardiography

New echo techniques: Real-time-3D echocardiography, Tissue Doppler imaging, strain and strain-rate imaging, speckle-tracking

Venue:

Institute for Postgraduate Medical Education
Hotel ILF
Budeřovick 15, 140 00 Prague 4,
Czech Republic
